Mines and Mining Stocks

COPPER BULLION FROM THE DIXIE

Utah & Eastern Company's Smelter Is Now Making 7,000 Pounds of Copper Daily.

RUMOR OF CONSOLIDATION

STANDARD AND NEW ENGLAND COMPANIES INVOLVED.

The Utah & Eastern Copper company, operating the Dixie mines below St. George, now has its copper smelter at Shem, a few miles from the mine, in full operation. From the treatment of about forty tons of ore a day approximately 7,000 pounds, or three and a half tons, of copper is being produced every twenty-four hours. The smelter has two furnaces, but only one of the two is kept in blast, as the management is not yet ready blast, as the management is not yet ready to cut loose in a broad gauge way. It will take two months yet to complete the building of the traction engine road be-tween the railroad and the smelter and until that is done, Manager C. H. Doo-little will not have the facilities to han-dle material as he will need to do when plant is running with both furnaces in

The traction engine and train are giving satisfactory service over the thirteen or fourteen miles of road that has been or fourteen miles of road that has been completed but its economical features have not yet been fully determined, nor can they be until the machine runs the entire distance of forty-odd miles, and arrangements are made for loading and unloading at both the smelter and railroad ends of the line. The company has seven four-horse teams of its own employed in delivering ore at the smelter and helping out in the building of the traction ing out in the building of the traction engine road. When the latter is completed these teams will all be available for business between the mines and the melter and the traction engine will be

made to do all the hauling from smelter to railroad and back.

President L. E. Stoddard, who came out from New Haven a little more than a week ago to inspect the Utah & Eastern properties, as well as those of the Bingham-New Haven company, of which he is also president, returned from the south with Manager C. H. Doolittle Sunday, but he was unable to remain over and inspect the Bingham properties owing to an spect the Bingham properties owing to an urgent message to return home. He was not worrying over them, however, as the ore sales from month to month gave him a pretty good idea of what was doing there.

BINGHAM-NEW HAVEN.

Old Officers and Directors Called on to Serve Another Year.

During the day that was spent in this Kendall by by L. E. Stoddard of the Bingham- Mohawk ham secretary and treasurer. F. F. Brewster and E. G. Stoddard are the other two directors.

As the business headquarters of the nothing in the way of reports was offere at the meeting here, and if anything of the kind is to come later it will be issue from the eastern offices. It is an ope secret, however, that the Bingham-Ner Haven company is earning good mone these days. The recent dividend told tha while there is a suspicion that anothe will be coming about Christmas time. Manager C. H. Doolittle has made fine producing property of the Bingham New Haven and matters are being round ed into such form that it will not be many months till he will have done the same with the Utah & Eastern, or Dixie properties, which are controlled by practically the same interests.

TALKING CONSOLIDATION.

Rumored That Standard Copper and New England Are to Join Hands.

Rumors were flying thick and fast yesterday as to what is and what is not be-ing done by the Standard Copper company at Bingham. It has been apparent for several days that a deal of some kind involving the control of the property was being incubated either here or in the east, but real, genuine news concerning the matter has been impossible to get. Yesterday it was stated that a big consolidation was on and that it involved the New England and other companies in the icinity of Standard ground. The latter company's engineer and man

ager, P. J. Donohue, went to camp, and it was immediately related that Boston parties were with him. Last night Mr. parties were with him. Last night Mr. Donohue was called up after reaching home and questioned. He said that he had no one from Boston with him at camp. At the New England he met E. E. Abercrombie, the managing director of that company, who has been out from Boston for a week, but there was no significance in the meeting, so far as it related to any deal on the properties.

Mr. Donohue reported that the Last

Mr. Donohue reported that the Last Chance mill had been placed in commis-sion, and that everything was running smoothly at the plant, so far as he was able to learn. This means that the Nevada-Utah company will now begin real-izing on the large amount of milling ores that the property contains.

MINING STOCK EXCHANGE.

Silver Shield and Some of the Other Neglected Issues Get Action.

Low priced stocks again had the call on the mining exchange yesterday. Durling the day a total of 101.520 shares, with a selling value of \$38,786.45, changed hands. Silver Shield, which has been a rather neglected proposition for several months, has stepped suddenly to the front and is now commanding about 22c a share to support 12c cply a few days are 12c. and is now commanding about 22 a shale as against 12c only a few days ago. Little Chief, Victor Consolidated, Star Consolidated, Tetro and Yankée Consolidated are also attracting attention and moving up in a manner strictly in keeping with the trend of the market. There were no signs of weakness at

Utah Stocks in Boston.

any point in the market, the buying of one day being apparently the strongest in stocks which ruled the lowest on the preceding day, and that is the way the market has been acting for some little time.

Following is the list of final quotations and record of sales made during the two regular and open board calis:

the dividend will be 2 per cent and that Amalgamated will sell higher. The local market was slightly better today with good buying in Old Dominion, Butte Coalition, Copper Range, Arcadian, Allouez and Atlantic. The public interest in copper seems to be slightly lessened, but there is no disposition to sell and we think the entire list will be better after a short rest. Quotations:

one, with Fred E. McGurrin as manager, with many other prominent men of the city interested. The following interview with Professor Fielding is published by the Virginia City Chronicle:

"I have visited all the mining districts in Nevada and from Colorado to Death valley and consider the showing in Dietrich equal to the best of them for the development of gold producing mines.

"The croppings are the most stupendous Following is the list of Utah and other stocks traded in on the Boston exchange yesterday showing the range of prices and the number of shares soid. Accompanying the report, which is furnished by James L. Pollock & Co., is the market letter of Paine, Weber & Co., as follows:

Boston, Oct. 16.—All the interest of traders in copper stocks is centered in the Amalgamated meeting on Thursday and copper stocks will probably be more or less erratic up to that time. We think interest on less erratic up to that time. We think interest on less erratic up to that time. We think interest of the most stupendous the ever witnessed, towering from ten to thirty feet above the surface and showing assays through their entire length ranging from \$24 to \$125 from samples taken by myself.

The troppings are the most stupendous development of gold producing mines.

"The croppings are the most stupendous district, and who still holds heavy interests there, came in from the district Monday night laden with specimens of gold ore that would attract attention anywhere.

Joseph T. Jenkins, for many years mining editor of the Tribune and for the past year editor of the mining department of the Intermountain Republican. has tendered his resignation in order to Join forces with a big brokerage and promotions that need only to be blasted down and the neavy interests there, came in from the Mountain district, and who still holds heavy interests there, came in from the district.

Mountain district, and who still holds heavy interests there, came in from the district. And who still holds heavy interests there, came in from the district Monday night laden with specimens of gold ore that would attract attention anywhere.

Joseph T. Jenkins, for many years mining editor of the Tribune and for the past year editor of the mining department of the interest of the mining district.

DON'T LET YOUR MONEY LOAF.

If you have much or little money, better have it earning something. Remember, all fortunes had their foundation laid in saving, and mon-ey makes money only when it is put to work.

It isn't thrifty to let your money lie idle, particularly when a strong financial institution would pay you four per cent per annum interest on it, compounded semi-annually. We are doing this for hundreds.

UTAH SAVINGS & TRUST CO., NO. 160 MAIN STREET. SALT LAKE CITY.

milled to return dividend paying values. There is an ample supply of fine water for milling and other purposes and the mountain slopes in the vicinity are wooded to the summits with nutpine.

"The Chicago-Nevada company's property is only two and a quarter miles from the line of the Nevada and California (C. & C.) railroad and the building of a branch to Dietrich will entail little more than the cost of rails and ties. By a tunnel on the east side of the Chicago-Nevada company's territory the ledge can be tapped in driving less than 200 feet at a depth of from 700 to 800 feet below the surface and I forecast a great future for the district. The bold outcroppings, carrying paying gold values from base to summit, are like the handwriting on the wall indicating the existence of a vast ore body below the surface."

ACQUIRES BIG PLACERS.

Guggenheim Exploration Co. Takes Over Hunker Creek, Alaska, Mines.

As an outcome of the trip made by Daniel and S. R. Guggenheim and several of their mining engineers to the Yukon and Klondike regions last summer it is announced that they have closed the deal for a very large property on what is known as Hunker Creek. In the Yukon. The property extends for about eight miles from the mouth of the creek where it enters into the Klondike river. The purchase is probably the largest placer mining transaction ever made, certainly in Alaska. The purchase includes the Anderson concession and the Redmond Bros., Mitchell and Milvain, Max Kellar and a large number of individual claims in the creek, including Paradise Hill.

The closing of this deal gives the Guggenheim Exploration company the control of practically all the placer mining properties now known in the Yukon district, together with the control of practically all the water power in that section. In addition the company owns large gold dredging rights on the Klondike river and is likely to take over further concessions of the same character on the river below the mouth of Hunker Creek. What consideration was paid for the several properties has not yet been made known, but it is said to have been a very considerable sum.

It is expected that the company will begin aggressive work both in the new

Considerable sum.

It is expected that the company will begin aggressive work both in the new placer and dredging claims at once and it is anticipated that the camp at Yukon will be the largest and most important in the gold regions of Alaska within a comparatively short time.

STRAIGHTENING OUT TITLES

Deeds to Property in Allen G. Campbell Estate Filed for Record.

bell Estate Filed for Record.

Provo, Oct. 16.—A deed from Charles Rufus Campbell, deceased, to Eleanor Campbell O'Kelly, Allen George Campbell. Byram Cullen Campbell and Caroline Neil Campbell of Riverside county, California, has been filed with the county recorder. The deed conveys, for a consideration of \$4,000, to the grantees (one-third to Eleanor Campbell O'Kelly, and two-thirds to the other grantees) all the right, title and interest of the grantor in the estate of Allen G. Campbell, deceased, except in the following mining claims: One-half interest in the Clamenta and Clamenta No. 2, two-thirds interest in the Dan McNamara, Washington, Little Butte, Brockton, New Century and Campbell, all in San Bernardino county, California.

The following mining deeds have been filed with the county recorder: A. Harvey and Jacob Nelson of Pleasant Grove, a one-twelfth undivided interest in the Pride of the West, and Pride of the West Nos. 2 and 3, in Silver Lake mining district; consideration \$500.

Jacob Nelson and Axel Johnson to Niels P. Poulson, all of Pleasant Grove, an undivided one-third interest in the Oregon mining claim in Alpine mining district; consideration \$1,000.

The John BOL THE JOHN BOL 18 Allen Gecased, to Campbell of Riverside Campbell of Rive

mining claim in Alpine mining district; consideration \$1,000.

FIRE AT CON. MERCUR.

Motor House and Sawmill Burned With Loss of \$8,000.

(Special to The Herald.) Mercur, Oct. 16.—A fire broke out in the motor house of the Consolidated Mercur company at about 6:30 o'clock this evening. While the volunteer fire department was on hand promptly and did good service, they were unable to quench the flames on account of the fierce wind that was blowing up the canyon. The flames spread from the motor house to the sawmill, destroying that building together with all continuous and several thousand. with all equipments and several thousand feet of lumber stored in the yards. The shed covering the tramway was attacked by the flames and a large section of it burned out. Seeing that the flames

were following these sheds rapidly in the direction of the big mill, Manager Dern ordered his men to clear out the section of the shed and by this means stopped the flames and saved the mill.

The most unfortunate feature of the fire was the damage done to the tramway and electric motors, as these were the only means of getting the ore to the mill. Manager George H. Dern, when seen after the fire, said he hoped to avoid a shutdown for an indefinite length of time by using horses on the tramway until new motors could be obtained. It will take a few days, however, to clear the debris from the track.

The loss will probably reach \$8,000, which is only partially covered by insurance.

Ore and Bullion.

Ore and bullion settlements in this city yesterday, as reported by McCornick & Co., amounted to \$135,000, as follows: Silver, lead, gold and copper ores, \$70,000; base bullion, \$65,000.

Metal Market.

Silver, 69%c per ounce. Copper (casting), 20%c per pound. Lead, \$5.75 per 100 pounds.

Mining Notes.

Ernest Bamberger, general manager of the Daly-West, has returned from a brief business trip to New York. C. D. Rooklidge left for Nevada Mon-day night to look after some of his mining interests in that state.

Six carloads of ore from Tintic, ten from Nevada and three from Idaho were released from the Taylor & Brunton sampler yesterday morning.

Arthur L. Thomas, purchasing agent of the Consolidated Mercur company, has returned from a trip east, where he was called on account of the sickness of

Two earleads of ore from Alta, two from Bingham, three from Tintic, one from Ophir and three from Stockton were released from the Taylor & Brunton sampler yesterday morning. Louis D. Gordon, the young Nevada operator who made his fortune in the Round Mountain district, and who still holds heavy interests there, came in from the district Monday night laden with specimens of gold ore that would attract attention appearance.
